YOUR ADVENTURE AWAITS.

THE ACADEMY

5th/6th Grade

9-Week Online Challenges

WCATY's Academy provides online challenges that replace a quarter of language arts and extend history, science, or math classes in over 75 districts. The research-based curriculum is assigned in weekly chunks, providing the perfect mix of community discussion and flexibility. Challenges begin with real-world problems. Students dig in by researching big questions, by reading fiction and non-fiction texts, by writing persuasive, informative and creative works and by interacting with other eager minds. Often the highlight of the course, students also attend face-to-face meetings where they participate in hands-on explorations. Instructors provide regular, personalized feedback. The assessment system focuses on documenting growth and helping students reflect upon their learning. Schools receive a midterm and final report that includes reading, writing, and interaction grades as well as a detailed description of the student's development.

FALL CHALLENGES

November 6th - January 12th

CLASSES WITH F2FS IN CESA 1
iRobot

LEAGUE
Engineer

CLASSES WITH F2FS IN CESA 2
Building Character
iRobot
Maiden Voyage

Reflective Leader
Engineer
Researcher

CLASSES WITH F2FS IN CESA 7
